PROFILE

Chinaza has over seven (7) years of professional experience spanning various industries. He has supported clients on multiple technology-related projects including User Experience Designs, IT project management, Robotic Process Automation (RPA), UATs, etcetera. He currently leads an engineering team tasked with designing and overseeing the build of a very complex and data-heavy core banking engine with multi-tenancy capacity; deployed either on-prem or on the cloud to manage data across several organizations and provide solutions to billions of customers.

TECHNICAL SKILLS

PROFESSIONAL EXPERIENCE & RESPONSIBILITIES

SENIOR ASSOCIATE (ANALYTICS & OPERATIONS)
KPMG NIGERIA

Product Design Lead:

1yr 8m [FEB 2022 – SEP 2023]

Client: Top-tier financial institution in West Africa (name withheld)

Solution: Novel Core Banking Engine deployment - Retail and Corporate

- I conducted issue analysis of existing applications with actual end-users and drafted the initial requirements backlog for the product delivery
- Led the product design team in conceptualizing and designing both wire-frames and full fledged prototypes of the proposed solution
- Successfully trained four proteges, from complete beginners to confident intermediate product designers, hence ensuring faster turnaround time on design refinements.
- Managed five different engineering teams across multiple locations as they worked collaboratively to deliver the solution
- Managed integration and cut-over issues with the development environment and mediated between the various engineering teams (both resource providers and resource consumers) to find working solutions where bottlenecks were encountered.
- Crafted robust test cases and oversaw the execution of regression tests for every iteration of the build.
- I was also in charge of the demo sessions showcasing the build progress and presenting project status reports to C-level executives in the bank

Consultant / Project Manager (ESB Integration Workstream):

6m [SEPT 2021 – FEB 2022]

Client: Zenith Bank Nigeria Plc.

Solution: Project Tiger (New core banking solutions implementation for lending, trade, treasury and CBA)

- I worked as a team lead and project manager for a mainstream implementation project
- Efficiently managed development activities across multiple, loosely-coupled teams
- I ensured tasks were executed to a level that met quality standards within a project management and commercial context
- Conducted interviews with relevant stakeholders, facilitated client sessions and ensured feedback were properly documented and communicated to the necessary audience.
- Proactively identified potential project risks and took informed and realistic approaches to problem solving

Lead UI/UX Developer:

9m [JAN 2021 – SEPT 2021]

Client: Coronation (Wapic) Insurance and Paralex Bank.

Solution: Delivering UI solutions for data-heavy applications and complex user flows

- I participated in the digital readiness assessment and corporate strategy development, that enabled the migration of Paralex bank from a Microfinance establishment to a full-fledged commercial bank in 2022.
- I led the UX strategy development and designed the user interfaces for the new customer and agent applications (web and mobile) of Coronation Merchant Bank insurance (formerly Wapic Insurance).
- Conducted interviews and iteratively designed functional prototypes based on qualitative and quantitative user feedback.
- Maintained and regularly updated the requirements backlog following user validation sessions

=====
==== Other Notable Achievements in the Firm =====

- Submitted an idea that scaled through the selection stage of the KPMG West Africa AI lighthouse ideation.
- I led a team of young analysts to design **SOTERIA**, an award winning application for organizational tax management. The idea was presented at the 2022 KPMG Global Innovation Summit and became one of the top three selections.
- I received the **KPMG Rockstar** award in September 2022, for exceptional service delivery.
- I trained multiple proteges and colleagues on product design and project management in **record time**
- I served as backup lead for the newly formed **Intelligent Automation** sub-unit in the KPMG tech cluster and championed the actualization of multiple RPA projects.
- I contributed to the 2020 and 2021 KPMG **Thought Leadership** and **Digital Scorecard** publications.

UI/UX ENGINEER

NERD OPERATIONS [Sept 2018 – Sept 2019]

Business enablement and corporate brand development

- I championed the conceptualization of effective UI/UX strategies and oversaw its implementation
- Conducted user acceptance tests and built front-end applications for web and Mobile devices based on end-user feedback
- I devised journey maps, user flows, wireframes and high-fidelity prototypes based on proven methodologies, stakeholder requests and end-user feedback for various clients, including a top-tier financial institution in Nigeria.
- Utilized Jira, git and slack for scheduling and managing development activities across various teams
- Designed, tested, and deployed multiple software development projects such as a cryptocurrency trading platform with blockchain payment integrations, and a digital wallet.

TECHNICAL LEAD, ICT UNIT, OFFICE OF THE VC

UNIVERSITY OF NIGERIA [Sept 2015 – May 2017]

Webometrics Team lead

- I was responsible for managing a part of the project team and prepared reports that was sent to the Vice Chancellor
- Understudied school portal management and Search Engine Optimization metrics
- I oversaw the quality assurance measures and migration of a large database of paper-based staff publications into a robust digital library.
- Conducted in-depth research on institution rankings and prioritized the implementation of relevant ranking metrics.
- Led the Webometrics sub-unit to achieve 1st place webometrics ranking for the University in January 2017
- Championed the initiative for digitally empowering students via personalized emails and blogs.
- Developed an online voting system (using PHP and JavaScript) for the university community.

DEVELOPER

DNELIX TECHNOLOGIES [Aug 2011 – May 2017]

Junior web and mobile developer

- Developed applications to run on web and mobile devices
- I conducted feasibility studies to determine preferred technology and approach to development
- I developed and integrated various applications with new or existing systems
- I designed, tested, and deployed multiple web projects such as a localized e-commerce platform for students, an online delivery system for a pizzeria and a conference platform for an international organization.
